

SPEECH ON:

WHICH IS BETTER PAPER BOOK OR E-BOOK....

Good morning/afternoon one and all present here,

My name is Neha Chaudhary and I'm from XI-A.

My topic is the ongoing debate...!!... which is superior e-book or paper book. Today I'm here to conclude on my opinion.

The first question comes in everyone's mind is, "Is reading a digital book different from reading a physical one?" So, I'm with the solution.

Firstly talking in favour with paper book, on my first well bullet point:

Paper book can be easily recycled and they are manufactured of less CO₂ and less fossil fuels, whereas for e-books, to make a device it needs many materials like metal, batteries etc which are not easily recycled. I'm taking this point as my first point because it plays a vital role in our environment.

- secondly, paper books do not strain our eyes, but whereas light produced by the screen can cause adverse eye strain over time. As nowadays, development over digital platform is gradually increasing, people are around 12-15hr in front of their laptops/mobile and all that stuff which

is a very most bad point on eye health.

- A fact I would like to share with you all that According to Neuroscience, digital reading only focuses your eye dot on the part of screen where as reading a actual book makes all parts of your brain work. Why this is so? And this is true you know:

Whenever you read a paperbook it is less distracting and more interactive by turning pages and also you focus your brain 50% more than reading an e-book, ... with an e-book all you're doing is just holding a device and then you just swipe the slider as you do it on a normal phone.

But while reading a paper book you are constantly having the pages to read and then just turning the pages by your hands and you are sometimes excited to know what's on the next page!! Because ~~it~~ it's leading you on into the story.

- The other bullet point:

while reading a paper book you can highlight any point and second time you can just search it and remember it. But where as in e-book if you highlight something it will give you notification of whatever you highlighted and that's good. But, along the notification of your study material you will also see:

Instagram: Arya just posted a photo
or so and so added you to her story, and
the snap chat, fb and you go into the circle.
So, what you will like to choose study material
or Instagram. ~~In~~ ^{present}
I know every person ~~sitting~~ over here might
have experienced this:

"Yor bohut padh liya, aakhein bohut heavy lag rahi
hai, ek kaam karti hu... sirf 5min, sirf 5min thoda
break leti hu, phir wapas padhungi... Mujhe confidence
he..."

And on that particular time, the person opens
Instagram or whatever, and the 1hr-2hr-3hr passes
away... "Uska confidence tabhihi hota hi hai"...

AND THIS LEADS TO A BIG DISTRACTION OF USING
DIGITAL DEVICE.... But paper book is just the paper
and you... right?

So always remember:

BE ADDICTED TO YOUR PASSION ... NOT TO YOUR
DISTRACTIONS - ...

- So Talking little about e-books too, otherwise the
person in favour with e-book will hit me after
my speech:
- So E-Books also have some advantages:
 - They are lightweight and we can carry it
anywhere... Whenever we feel to read we can.

- They are accessible anywhere and also it is a sharable content, you can just mail your friend quickly if he needs it.

- And the best advantage^{is} it has 'read aloud feature' by Google Assistant. and this is much better right... Whenever you feel lazy you can tell her to read it for you.

So in a Nutshell, concluding my speech - I guess paper book is much better than e-book as it has many advantages. Yet science is inclusive, you can use any one.

- Make your Book your Best friend it will give you a big success some or the day.

DON'T BE IN THE PAST,

DON'T THINK OF THE LAST,

BECAUSE THE WORLD IS CHANGING SO FAST...

you have lot of competition around you.

So, START WHERE YOU ARE,

USE WHAT YOU HAVE,

AND DO WHAT YOU CAN.

I hope you all learnt from my words and you took this knowledge into consideration.

Other than this I hope you all have a nice day

AND,

YEAH PICK UP A PAPER BOOK, BELIEVE ME IT'S

WORTH IT !!!

Thank You..... !!
