

Target of five year plan

Employment and Poverty:

In comparison to the end of the 11th plan, the poverty rate will be reduced by 10%.

There are 5 million new job vacancies and skill certifications in the non-farm sector.

12th five year plan

- Twelfth five-year plan- Objectives:
- The real GDP is increasing at a rate of 8% each year. Agriculture is expanding at a rate of 4%. Manufacturing is expanding at a 10% annual rate. Every state must outperform the 11th plan in terms of economic growth.

- Education:
- The average number of school years will increase to seven.
- For each age group, there are 20 lakh seats available in higher education.
- End school enrollment discrepancies based on gender and social status.

- Health:
- Reduce the IMR to 25 and the MMR to 1 to increase the Child Sex Ratio to 950.
- Reduce child malnutrition in the 0-3 age range to half of the NFHS-3 level by lowering the total fertility rate (TFR) to 2.1.

Environment and long-term viability:

- Increase green cover by 1 million hectares every year.
- 30,000 MW of renewable energy will be created during a five-year period.
- By 2020, the GDP emission intensity will be 20-25 percent lower than it was in 2005.

Delivery of Services:

- Banking services are available to 90% of Indian households.
- The Aadhar-based Direct Cash Transfer Scheme will be used to distribute subsidies and welfare payments.

- Infrastructure:
- All villages will have access to power, and AT&C losses will be cut in half.
- Villages are connected by all-weather roads.
- National and state roadways are required to have at least two lanes.
- Both the east and west coasts have dedicated freight corridors.
- In rural areas, teledensity has reached 70%.
- Half of the rural population will have access to 40 litres of drinking water per day, and half of all Gram Panchayats will be Nirmal Grams.

- **Before the Twelfth Five-Year Plan, there is criticism and challenges:**
- Agriculture Growth Rate Is Unrealistic: The 12th Five-Year Plan's most important aim is to accelerate and achieve a per-annum growth rate in agriculture.
- Poverty and unemployment issues have been overlooked: The plan talks about accelerating industrial growth to 10% and agriculture growth to 4%, as if achieving those goals alone would solve the problems of poverty, malnutrition, and insecurity faced by the country's masses.

- **Conclusion:**
- The 12th Five-Year Plan (2012-17) targets an annual growth rate of 8%. This is the revised rate when compared to the initial approach paper. The slogan of the Twelfth Plan is “Faster, More Sustainable, and More Inclusive Growth.” The Twelfth Five-Year Plan of the Government of India was expected to reach a growth rate of 9%, however on December 27, 2012, the National Development Council (NDC) agreed to an 8% growth rate for the Twelfth Plan. The government’s goal for the 12th Five-Year Plan is to reduce poverty by 10%, which has been largely achieved thanks to the government’s poverty alleviation programmes.
