2.1 WHAT IS MARKETING?

- **Marketing** has always been about **connecting with your audience** in the **right place** and at the **right time**.
- In today's era of technology it simply means you **need to meet** them where they **are spending more time and that is on the internet**.
- Traditional Marketing examples might include tangible items such as business cards, print ads in newspapers or magazines. It can also include posters, commercials on TV and radio, bill-boards and brochures.

2.2 WHAT IS DIGITAL MARKETING?

- ❖ **Digital Marketing** is doing marketing of products ,services ,brands or people on internet using digital devices like laptops and mobile phones.
- ❖ Examples of digital marketing include things like websites, social media mentions, YouTube videos, and banner ads. Specifically, digital marketing is similar to traditional advertising, but using digital devices.

DIGITAL MARKETING

VS.

TRADITIONAL MARKETING

"NEW MARKETING" is
"any marketing tactic
that relies on earning
people's interest
instead of buying it."

Communication is
interactive and two-way.

Customers come to you:
• Via search engines ,
referrals, social media

Marketers provide value.

Marketer seeks to entertain
and/or educate.

"OLD MARKETING" is
"any marketing that
pushes products or
services on customers."

Communication is one-way.

Customers are sought out:
• Via print, TV, radio, banner
advertising, cold calls

Marketer provides little to
no added value.

Marketer rarely seeks to
entertain or educate.

CHANNELS IN DIGITAL MARKETING

CHANNELS IN DIGITAL MARKETING

1. Search Engine Optimization :

- SEO is the **process of boosting content and technical set-up of the website** so that it appear at the top of a search engine result for specific keywords.
- SEO is a technique used for: designing and developing a website be to rank high in search engine results.
- SEO is useful in increasing the number of visitors to a website.

SEO

CHANNELS IN DIGITAL MARKETING

From **SMS** and **MMS** to **in-app marketing**, is a way to promote products or services through mobile devices.

Channels in Digital Marketing

3. EMAIL MARKETING

- Companies **communicate with their audience through email marketing.**
- Emails are used to promote content, events, and discounts, and also to direct people toward the business's website.

Channels in Digital Marketing

4 PAID SEARCH

- Paid search or pay-per-click (PPC) advertising refers to the **"sponsored result" on the search engine results pages (SERP)**.
- With paid search, you only pay when your ad is clicked.
- PPC ads are visible, flexible, and effective for many different types of organizations.

Channels in Digital Marketing

5. CONTENT MARKETING :

- "Content is king?" :- Quality content is the fuel that drives your Digital Marketing strategies.
- Content Marketing denotes the creation and promotion of content assets in order to generate brand awareness, lead generation, traffic growth, and customers.
- Content marketing is a form of marketing focused on creating, publishing, and distributing content for a targeted audience online.

Channels in Digital Marketing

6. SOCIAL MEDIA MARKETING

- ❖ Social media marketing is the use of social media platforms and websites to promote a product or service.
- ❖ Social media marketing is the use of social media platforms to connect with your audience to build your brand, increase sales, and drive website traffic.
- ❖ The major social media platforms are Facebook, InstaGram, Twitter, LinkedIn, Pinterest, YouTube, and Snapchat.

WHAT IS SEARCH ENGINE?

- **Search Engine** is an online program or software that helps users to search for information on world wide web.
- The search results are generally presented in a line of results often referred to as **Search Engine Results Pages (SERPs)**.
- **Crawler** is a program used by search engines to collect data from the website.

WHAT IS SEARCH ENGINE?

WAYS TO RANK WEBSITE

There are **two ways to rank website**

1. one can **pay and rank**
2. without payment -> **SEO process. i.e. Organic Search**

ORGANIC SEARCH	PAID SEARCH
Organic Search results appear in the middle of the page.	Paid Search results appear at the top of web page.
Organic Search gets less clicks.	Paid search gets more clicks.
Organic Search is a long process to get rank in one of the top positions.	By paying big amount, site can be ranked on top quickly.

WAYS TO RANK WEBSITE

There are two ways to rank website

1. one can **pay and rank**
2. without payment -> **SEO process. i.e. Organic Search**

TECHNIQUES OF SEO

SEO. **Techniques and strategies** used **to get higher search rankings, and breaking search engine rules** are

- **White Hat SEO** : It uses Search engine- approved website optimization techniques.
 - Optimize for humans not search engines;
 - Create quality content that people actively want to read and share
 - Create a website for the right reasons!
 - To improve user experience ethically and genuinely
- **Black Hat SEO** : Uses techniques that search engines do not approve.
 - Break or Bend search engine rules
 - SEO relies on manipulating Google's algorithm to improve rankings.
 - Hack into peoples' websites and copies contents similar to the original web site
 - The Google crawler reads the content and thinks the website is original one and it ranks the page

Refer the following strategies and differences in short about Black Hat and White Hat techniques—

WHITE HAT

WHITE HAT STRATEGIES

- Relevant content
- Well-labeled images
- Relevant links and references
- Complete sentences with good spelling and grammar
- Standard-compliant HTML
- Unique and relevant page titles

BLACK HAT

BLACK HAT STRATEGIES

- Duplicate content
- Invisible text and stuffed keyword
- Cloaking or re-directing the user to another site or page
- Links from sites with non-relevant content

Note : REMEMBER - Always follow a White Hat SEO tactic and don't try to fool your site visitors. Be honest and definitely you will get proper rank. Now Google's search algorithm has become intelligent as it finds you are fooling to rank your website, It ranks you down and black list you and your business go down in open market.

ways to approach SEO to generate traffic to your website

Search engines don't look at a page the way a person looks at it. They can **only read the source code of the page.**

ways to approach SEO to generate traffic to your website

1. On-Page SEO :

- Anything within< > is HTML code. Anything between two sets of tags is something that could get put on the page for a person to read.
- The text inside the < > tells browsers and search engines how to render the information between the tags.
- The reason it is called on-page SEO is that these changes are visible to readers.
- It is a balance between giving the right information to search engines without compromising the information that your customers are reading on the page.

ways to approach SEO to generate traffic to your website

2. Off-Page SEO :

- Off-page SEO is about everything that **doesn't** happen **directly** on your website
- Off-page SEO is about, **among other things**, **link building**, **social media**, and **local SEO**.
- It allows generating traffic to your site.

OFF Page

3. Technical SEO

- Important step in the whole SEO process. If there are problems with your technical SEO then it is likely that your SEO efforts will not generate the expected results.
- **site speed**. People do not like to wait for slow websites. If your pages load slowly, you will be ranked lower than a comparable site that has faster pages.
- **mobile friendliness**. If your site looks bad on a mobile device, search engines can detect that and lower its rankings on mobile-specific search engines.

2.4 OPTIMIZING WEBSITE

1. SEO : Page structure optimization

- Html programs should start with `<!doctype html>`.
- If it is singular tag eg . `<img>` it should be self enclosed like this- `<img />`
- Order of tags should be proper. Most of the time recently opened tag will be closed first.

○ It is recommended to use

1. <TITLE> : Title is the first thing that user notices in search result list while using Google for searching. Contents should be up to 60 characters (spaces included).

2.Meta-description Tag : While creating a web page, Meta description should be used to boost your On-Page SEO. Meta Description should be between 70 and 160 characters (spaces included)

3.Heading Tags : The page should include proper heading tags from `<h1>` to `<h6>`

4.Image Tags with ALT attribute : The alt attribute gives information about the image, so even if image does not download, it can make the viewers understand the image related information

Example of Page structure optimization

```
<!doctype html>
<html>
  <head>
    <title>structure with page opening and appropriate order</title>
  </head>
  <body>
    <h1> Let us understand SEO</h1>
    <p> Webpage optimization helps for higher ranking in search engines.
      <b> There are number of ways to optimize the pages
        <i> Even the Social media plays an important role!!!
      </b>
    </p>
  </body>
</html>
```

[Click here to here](#)

- **Note :** In the above example check the ordering of <p>,and<i>. The innermost tag ends first, followed by the outermost tag. The other basic tags also follow a proper ordering as per the HTML structure.

SEO KEYWORDS

- SEO keywords are the important words and phrases related to the developed website content.
- You can use your intelligence to rank your website using small keywords or long keyword.
- **A long tail** is a long keyword . long keyword may be used by less websites. This may result in ranking the website at higher position.

- **A short tail** is a short keyword . It is a small keyword used by millions of people.

2.5 SEO AUDIT

- An SEO Audit helps to find out what could be done to improve ranking on search engines, so that consumers could find the website with greater simplicity. It analyses the websites health Eg -Seomator, SEOptimer are few free SEO audit tools available on net.
- SEOptimer is a free SEO Audit Tool that will perform a detailed SEO Analysis. It provides clear and actionable recommendations that can be taken to improve your online presence.
- The URL are as follows- <https://seomator.com/free-seo-audit-tool>
<https://www.seoptimer.com/>
- Recommendations that can be taken to improve your online presence.

AUDIT RESULTS OF SEOPTIMIZER WILL HAVE FOLLOWING DETAILS

- Overall Ranking of the site
- Recommendations for improvements
- Search Engine Optimization
- Usability of the website
- Performance of website
- Social links
 - Connected social accounts
- Security parameters
 - SSL Enabled
 - HTTPS Redirect
 - Email Privacy
- Header content recommendations
 - Title and Meta description
- Body Content
 - Header Tags
 - Body content recommendations
 - Keyword Consistency
 - Amount of content in the pages
 - Links
 - Number of backlinks
 - Broken links
 - Friendly links
 - On page links
 - Technology list which is used in the website

HTML HEADER

- i) **<!doctype html>** : Webpages having HTML code should start with **<!Doctype HTML>**

- ii) **<Title> tag** : A title tag is an HTML element that specifies the title of a web page. Title tags are displayed on search engine results pages (SERPs) as the clickable headline for a given result therefore it is recommended to use **<title>** tag.

- iii) **<Meta>tag** : Meta tags are snippets of code that tell search engines important information about your web page, is also essential to boost your On-Page SEO.

HTML CONTENT

- **Heading Tags** : Heading tags are necessary for both usability, and SEO of your web page. Should include proper heading tags from <h1> to <h6> wherever required.
- ** tag With alt attribute** : By adding an alt text, provides a textual description of what's on that image to search Engine . This improve accessibility and your chance of ranking high in image search.
- **Keyword Consistency** – Keyword consistency means having keywords or sets of keywords those will rank your site in search engine.

3.LINKS

- **Number of Backlinks :** Backlinks are links that are directed towards your website. Google, will give more credit to websites that have a good number of quality backlinks.
- **Broken Links:** Broken links are links that send a message to its visitors that the webpage no longer exists, triggering a 404 error page
- **Friendly URLs :** SEO friendly URLs are URLs that are designed to meet the needs of users and searchers.

4) Indexing :

- Indexing is the process of adding web pages into Google search.
- It is very important in SEO to increase the ranking of the webpages.

5) Googlebot :

- Googlebot is the Google's spider . i.e. the robot that pass over the Web and indexes pages for inclusion in Google's database.
- Googlebot collects documents from the web to build Google's search index.

OTHER FACTOR :-

i) Robot.txt : Robots.txt file is what tells the search engines which pages to access and index on your website and which not.

For example, if you specify in your Robots.txt file that you don't want the search engines to be able to access your thank you page, then. Your Robots.txt file instructs these programs not to search your thank you page on your site.

- You can restrict pages using a “disallow” command as follows :
- User-agent: *
- Disallow: /thankyou.html

OTHER FACTOR :-

ii) Device Rendering :

This check **visually demonstrates how your page renders on different devices**. It is important that your page is optimized for mobile and tablet devices as today the majority of web traffic comes from these sources.

iii) Legible Font Sizes :

It means that a font size declared as bigger, smaller, or the same size as should be easily readable (legible) when a user is viewing the page on mobile or smaller screens.

iv) Tap Target Sizing :

- A tap target is **any element on a web page that a user interacts with**.
- These include **action buttons, links, ads, etc.** that a user taps on when accessing a web page using a touch screen.
- Therefore the **size of such taps/touch elements should be relevant** neither too small nor too big.

7) PERFORMANCE RESULTS :

1) Number of Resources :

- This check displays the total number of files that need to be retrieved from web servers to load your page.
- Having more files to retrieve increases the number of server requests and can subsequently increase page load time.
- It is a good to remove unnecessary files .

2) Page Speed Info :

Page speed does affect SEO as it is a direct ranking factor. While creating a website attention is given on the design content and as many visuals as possible. This can slow down the website and obstruct usability.

3) Page Size Info : The term page size in the SEO world refers to the downloaded file size of a given web page.

8) SEO Social Media Optimization :

- It deals with enhancing the website's ranking, using Interactive Communities like Facebook, twitter, blogs, forums etc.
- When these communities have links to the created website it builds familiarity and trust about the website.

9) SEO Security Checks :

- Security is important to ensure your website protects user data,.
- It includes SSL Enabled yes or no whether it follows HTTPS, Malware Check, Email Privacy.
