- ❖ Accelerate discovery
- ❖ Open up a world without borders

Steps that make blog writing easy..

How to Set Your Blog Up For Success

1. RESEARCH IS ESSENTIAL

Whichever topic you choose, whatever genre you write on, there should be multiple sources of information, preferably with varied viewpoints, so that you provide an unbiased opinion based on facts

2. WHO'S THE AUDIENCE

Creative writing is different from technical writing, and thus, the audience is also different for that matter. Think from a reader's perspective and try to put yourself in their shoes while you put out your thoughts.

3. AVOID LENGTHY PARAGRAPHS AND ESSAYS

Being precise and coherent with the article is necessary.
Break up the points in bullets and
short paragraphs, and avoid using complex sentences.

4. STRESS MAKES IT A MESS

When you have too much going on in your mind, it's difficult
to focus on the blog.
Try to write during the time of day when you feel relaxed, or
can write without any noise from the environment.

5. UNIQUENESS

Creative writing works when you are able to portray your true self through the blog. The blog should have your stamp of authority and should resonate with the audience.

In short

- ✓ Define your blog's purpose.
- ✓ Identify your audience.
- ✓ Set clear, measurable goals.
- ✓ Do research online.
- ✓ Allocate resources to your blog.
- ✓ Use your blog to fuel a topic-driven content strategy.
